Everybody knows that having a layover is a drag. After all, what's worse for than sitting in an airport, killing time, waiting for a flight that's been delayed an extra hour or two.

However, even though the time spent in an airport may never be particularly fun, it doesn't have to be miserable either. On the contrary, the facilities of some airports are actually quite good, offering a variety of places to help ease your travelling woes, including, of course, restaurants. It is for that reason that we, here at Traveler's Today, have listed below five of the very best culinary hotspots in American airports, places that will provide quality food and quality entertainment while you wait for your particular jet-plane to arrive.

## 2. Sushi Maki, Miami International Airport

If there's one thing airport food definitely is not, it's fresh. However, Sushi Maki defies the stereotype, offering recently caught fish every single day. Indeed, with many dishes coming straight off the coast of Southern Florida, this unassuming spot rivals almost any other sushi bar in the country. That, plus a lovely serving staff and lightning-quick service, makes Sushi-Maki a must-visit on your next trip to Party Capital, USA.
